Waste Site Reclassification Form

Date Submitted: 4/6/2000	Operable Unit(s): 100-NR-1	Control Number: 2000-035
Originator: B. H. Ford	Waste Site ID: 116-N-8	
Phone: 372-9242	**Type of Reclassification Action:**	

Type of Reclassification Action:
Rejected ◉
Closed-Out ○
No Action ○

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

Description of current waste site condition:

Containers are stored on a curbed and fenced concrete pad south of the 163-N Building. The pad is covered by an open metal shed, divided into three storage areas each with its own locked gate. The entire unit is approximately 45 by 18 meters (150 by 60 feet). A small cabinet in front holds personal protective equipment and spill response materials. The front of the unit is an asphalt parking/driving area; the sides and back are gravel. It is an active 90 Day Storage Pad.

RECEIVED
OCT 0 3 2000
EDMC

Basis for reclassification:

The pad is an active pad listed on the Environmental Restoration Contractor's 90 Day Pad Inventory List as the 1330N 90 Day Accumulation Area. This method for managing active 90 Day Storage Pads is in agreement with Section 2.0, "Scope," of TPA-MP-14, and thus tracking these sites through WIDS is not necessary. The 90 Day Storage Area and all dangerous waste are managed in compliance with WAC 173-303-200(b)(i) and will be closed in compliance with WAC 173-303-630(10).
